

Pre-Shipment Inspection (PSI) Services

Customized solutions for safeguarding of Customs' revenue

Pre-shipment Inspection services are designed to assist Customs authorities in facing challenges related to the growing trade volumes worldwide and to the significant increase in the illegal traffic of goods and people. PSI activities are regulated by the World Trade Organization (WTO) "Agreement on Pre-shipment Inspection".

Cotecna Pre-shipment Inspection programs are based upon the physical control of goods, classification and Customs valuation. They also contribute to trade facilitation and the protection of national industry. Cotecna offers tailor-made solutions to meet the specific needs of Customs and also contributes to improving Customs procedures.

With an important network of offices and a global workforce of close to 4 000 staff and agents, Cotecna has been an authority in the inspection industry for governments for over thirty years. Cotecna is one of the world's leading inspection companies and as an independent partner for many countries has acquired essential competence in trade facilitation and Customs support.
